

WOOD ONNECT

Group Chain of Custody System

Values statement

The WOOD CONNECT Group Chain of Custody system is owned and managed by WOOD CONNECT and is certified to Australian Standard AS4707.

Products with the RW/PEFC claim and/or label provide confidence to customers and consumers that the raw material originates in a sustainably managed forest, recycled material and controlled sources. All inputs have undergone a due diligence test to establish legality and negligible risk of originating from controversial sources.

The system is maintained by a coordinator and is annually assessed by accredited independent third-party auditors.

Objectives have been established to ensure continuity, validity and integrity of the system. These quality objectives will be reviewed annually in a management review meeting.

The objectives of the system that all license holders and Wood Connect commit to are:

- The promotion of the lawful use of forest products.
- Generating consumer confidence in the origin of timber and forest products.
- Complying with all requirements of the CoC system.
- Ensuring compliance with applicable laws and/or regulations covering environmental impacts.
- Recognising the right for personnel to collectively bargain consistent with the International Labour Organisation conventions.
- Providing employment opportunities to the local and regional workforce.
- Conforming to all relevant workplace health and safety requirements
- Ensuring continual improvement of the system to support changing market demands, modern practices and technological developments.
